

A SencorpWhite Brand

PowerColumn³ Vertical Lift Module

Tough, innovative, American-made VLM for intelligent inventory logistics

SencorpWhite is an industry leader in secure packaging and advanced logistics systems. Innovative sealing and thermoform packaging systems, as well as custom inventory management hardware and software solutions, serve a variety of markets including consumer products, life sciences, defense, and aerospace. SencorpWhite's best-in-class customer support, technical expertise, system reconditioning services, and parts replacement resources offer unbeatable reliability and value for customers worldwide.

A market-leader in innovative, integrated inventory management and packaging solutions, SencorpWhite is one of the original carousel manufacturers, and has stayed at the cutting-edge of development for over 60 years.

The PowerColumn³ (PC³) Vertical Lift Module (VLM) is the only VLM designed and manufactured in the United States, and is ideal for discrete part storage and retrieval in a variety of applications, including manufacturing, warehousing, and distribution.

The PowerColumn³ incorporates automatic product height sensing, enabling automatic slotting flexibility, and advanced control software. Optional SencorpWhite software links multiple machines and/or ancillary equipment into customized inventory management systems.
